

## **IT Power Consultants celebrate their 10th anniversary!**

**Berlin, July 2010 – In July 2010 IT Power Consultants celebrate their 10th anniversary. The consulting company operating in the field of embedded software looks back on a successful decade with continuous growth.**

„ We set up the company in the year 2000 with the vision of error-free embedded software in cars”, recalls Mr. Sadeghipour, co-founder and CEO. Today, the company is well-known as an expert in testing embedded software. Moreover, the company supports other development phases and activities with consulting and operative services such as requirements management and model-based development. A number of projects in cooperation with reputable automotive manufacturers and suppliers have been led to fruition.

Mr. Sadeghipour reveals one factor of the company's success: „Our customers appreciate our specific knowledge and our versatile experience with developing methods and tools for embedded software.”

Innovation and curiosity affect the working method as well as knowledge and experience. “The automotive electronics industry is developing rapidly. That doesn't only apply to the systems themselves, but also to the developing methods and tools”, says Mr. Sadeghipour. “Our challenge is to be one step ahead. Therefore, we commit ourselves to research projects and give our employees space to further their technical knowhow.”

Today, the company operates in the automotive as well as in the medical technology industry. “The first 10 years were not only an exciting but also a successful trip. We are proud of all the things we have achieved and are looking forward to mastering the next challenges”, says Mr. Sadeghipour.
