

Introduction into the automatic test evaluation by signal comparison with the tool MEval

Berlin, June 2008 – On July 29, 2008 IT Power Consultants organizes an introduction into the automatic test evaluation by signal comparison.

Especially, for testing automotive embedded systems signals have to be compared. Then the question arises: Does the test signal have the expected behaviour?

The answer to this question can easily be found with the tool MEval which evaluates signals automatically. Thus, back-to-back and regression tests can be executed easily.

Date:

Tuesday, July 29, 2008
