

The new release SimEx R1.10 supports the XML conversion of MATLAB R14 models

IT Power Consultants now released the new version of SimEx, the tool for the conversion of MATLAB® / Simulink® models into the XML format (and vice versa).

The new version SimEx R1.10 was adapted to the MATLAB / Simulink / Stateflow® R14. The tool now converts Simulink R14 models into the XML format and vice versa. Moreover, the graphical user interface was improved.

The conversion tool SimEx can be applied versatilely in the model based development process. The generic XML format enables an integrated tool environment, where the Simulink / Stateflow models can be used in different tools.

About IT Power Consultants

IT Power Consultants combine convincing core-competencies from the field of quality assurance and the development of software-development tools to innovative services and products for software development in the automotive industry. For additional information, visit www.itpower.de.
